

ABOUT NETIS

SYSTEMS CO., LTD.

Netis Systems Co., Ltd is a global leading provider of networking products and solutions in the data communication industry with advanced technology, outstanding product quality and satisfactory customer service.

Netis company is experienced, professional in the R&D, Production and Sales of networking devices. Now it has three worldwide independent brands "netis", "netcore" and "stonet". Product lines of Netis company includes Wireless routers, Access point wireless adapters, Dump switches, POE switches, Industrial switches, OLT, ONT PON etc., and it is developing some new products that are related to IOT, CCTV to create more benefits for the market and the society.

MANUFACTURING CENTER

- National communications and intelligent hardware production base.
- National intelligent manufacturing demonstration base.

Small Office and Home Office WiFi Coverage Solution

1. WF2409PD supports POE, less wire cost, easier to install, more safety;
2. You can use P210GM to manage Power OFF/ON and internet speed;
3. All products above support cloud-manage from APP: BeeWiFi;
4. This network solutions is suitable for hotel, apartment and other small network scenarios, easier for owner to manage the entire network.

Cloud Managed POE Switch Series

Manage your switch through BeeWiFi remotely and easily

App Management VLAN Isolation Strong Power Port Renaming Restart Remotely

Why Choose Cloud-Managed POE Switches ?

- 1. Easily manage devices and network setups via BeeWiFi, saving time and effort.
- 2. Conveniently unify management across multiple projects, such as cafe, office and farms all from one phone.
- 3. Perform functions such as VLAN Isolation, Port Management, and Device Reboot directly through BeeWiFi.

Remotely manage multiple projects through BeeWiFi

Enterprise Wireless Networking Solution

Gigabit access, 2.5G uplink, optical fiber convergence, monitoring wireless hybrid networking.

- Higher specifications: AX3000, uplink 2.5G port, 2.5G gateway
- Larger capacity: up to 120 units can be effectively carried by a single AP
- Smarter roaming: solving the problem of sticky terminals

Normal Network Cable
POE Power Line

Whole House Wi-Fi Coverage Solution

Villa/large unit/high-end home networking set.

NR105GPE is an enterprise router that supports POE power supply. It can directly power the AP through network cables without the need for separate POE switches, saving overall networking costs and making it simple and easy to use.
